How we got here

Red Hat is *still* Red Hat

IBM is an ideal teammate to scale and accelerate Red Hat's future

~381,000
Employees worldwide

\$78.8B
In '18 revenues

\$19.2B
In '18 cloud revenues
+12% YOY

- IBM is one of the most storied technology companies in the world with an unparalleled track record of innovation and vast expertise across industries
- As a Red Hat partner for more than 20 years, IBM offers complementary hardware and serves as a champion of open source technology
- IBM and Red Hat will continue to collaborate for the success of thousands of customers

IBM has been a longtime supporter of Linux with
\$2 billion
in Linux investments
across its platform over
the past 2 decades

The opportunity ahead

In the coming weeks and months, these are some of the ways we plan to work together

Bring Red Hat solutions everywhere IBM is

Today, Red Hat operates in more than 40 countries; IBM operates in more than 175 countries. We'll explore how to expand availability of Red Hat's open hybrid cloud portfolio in more places.

Optimize IBM's technologies for the Red Hat portfolio

Through our existing partnership, many IBM technologies are already certified for Red Hat Enterprise Linux and Red Hat OpenShift. IBM will work to optimize its technologies for the Red Hat portfolio and to enable customers to use them everywhere Red Hat runs, including multiple public clouds.

Expanded corporate social responsibility + STEM initiatives

Our aim is not only to be the best hybrid cloud company, but also to be the best company for the world. Red Hat already champions STEM initiatives like CO.LAB and skills-building programs like Red Hat Academy. IBM has been a powerful force in STEM and gives back to communities around the world through initiatives like P-TECH, Corporate Services Corps, and Call for Code. We'll work to see how we can expand these efforts to do more together.

Thank you

Red Hat is the world's leading provider of
enterprise open source software solutions.
Award-winning support, training, and consulting
services make
Red Hat a trusted adviser to the Fortune 500.
